

LOHITA V

SOFTWARE ENGINEER

+91 93604 36504 | lohitenkatesh@gmail.com | [LinkedIn](#) | [Github](#)

PROFESSIONAL SUMMARY

Information science and engineering graduate with 6 months experience at Zoho building production backend infrastructure. Proficient in Python, Java, and MERN stack with hands-on experience in ML pipelines and AI-integrated systems. Strong problem-solver with 400+ problems solved and a LeetCode contest rating of 1530.

EDUCATION

Bannari Amman Institute of technology | 2022 - 26 | B.E. Information Science and Engineering | CGPA: 8.12

TECHNICAL SKILLS

Programming languages: Python, Java, C, JavaScript

Frameworks & Libraries: ReactJS, Node.js, Express, Tailwind CSS, Flask, TensorFlow

Databases & Platforms: SQL, MongoDB, ChromaDB, Prometheus, Grafana

AI/ML: HuggingFace Transformers, LangChain, QLoRA, RAG, SentenceTransformers

PROFESSIONAL EXPERIENCE

Software Engineer Intern, Zoho

June 2025 - Nov 2025

- Reverse-engineered executable binaries using Ghidra to decompile code, leveraging Gemini AI API to interpret and document decompiled logic.
- Built and automated DB monitoring pipelines using Prometheus, Grafana, PMM, and Bash.
- Developed alert-driven automation for corrective actions (service restarts, threshold-based responses).
- Created web interface to onboard MySQL servers and auto-configure exporters.

PROJECTS

StyleFit - A Personalized Outfit Recommendation System

Jan 2025 - Apr 2025

Tech Stack: Python, Flask, TensorFlow (MobileNetV2), PostgreSQL, HTML, CSS, JavaScript

- Built an end-to-end outfit recommendation web app — users upload clothing images, MobileNetV2 classifies them by occasion, and the system suggests pairings from their personal wardrobe.
- Implemented user authentication (Flask-Login) with per-user wardrobe storage in PostgreSQL, making recommendations personalised and stateful across sessions.

PCB Industry-Focused LLM (Research Project)

Jan 2026 - Apr 2026

Tech Stack: Python, SentenceTransformer, Hugging Face Transformers (LLaMA), RAG, ChromaDB, QLoRA

- Built an end-to-end RAG pipeline over 7M characters of domain text — PDF extraction, chunking, embedding (BAAI/bge-large-en-v1.5), and vector retrieval using ChromaDB.
- Fine-tuned LLaMA 3.1 8B using QLoRA (r=16, 3 epochs) on 997 curated Q&A pairs, reducing training loss from 1.1 to 0.62.

ADDITIONAL INFO

- **Languages :** English, Tamil, Kannada
- **Certifications:** The Complete 2024 Web Development Bootcamp (Udemy), Machine Learning with Python (IBM)
